

D. DONE WATCHES

MECHANICA B03 - LIMITED EDITION OF 50 PIECES

A collective endeavor that has brought to light the exceptional craftsmanship of our partners and swiss suppliers. Every detail of this exclusive edition, limited to just 50 pieces, has been meticulously refined : an ETA 6497-1 movement, expertly reworked into a striking silver skeletonized version, a Grade 5 titanium case enhanced by a subtle interplay of polished and satin finishes, and a blue FKM rubber strap featuring a new titanium deployant clasp.

"A fusion of strength and simplicity for unmatched intensity" — This is how we define our latest MECHANICA B03 Titanium.

DONE WATCHES

A DESIGN THAT IS BOTH POWERFUL AND REFINED

With a diameter of 43.8 mm and a slim profile of just 10.9 mm, the B03 boasts an elegant silhouette and a strong presence. Its ultra light Grade 5 titanium case, combined with finely proportioned lugs, ensures absolute comfort and an almost imperceptible feel on the wrist.

From the very first glance, the exceptional craftsmanship is evident, both in the case construction and the in-house hand-wound caliber.

A METICULOUSLY ENGINEERED MECHANICAL ARCHITECTURE

Every element, front and back, has been designed to enhance the strength and depth of the movement.

The B03 skeleton movement stands out with its delicately openworked bridges, revealing an innovative cut of the ETA 6497-1 base movement, ensuring perfect harmony and remarkable visual balance.

DONE WATCHES

The "flat-polished" finish on the main plate and the finely "grained" texture within the bridges' cutouts add a technical and contemporary touch to the timepiece.

Time reading is optimized with a rehaut featuring a precisely crafted hour track, echoing the aesthetic codes of skeletonized design.

A custom-developed rubber strap completes the timepiece, adding a sport-chic touch while ensuring outstanding comfort and fit. It is equipped with a titanium deployant clasp, elegantly engraved with the brand's logo.
