

D. DONE WATCHES

MECHANICA B03 - LIMITED EDITION OF 50

Following the successful launch of the MECHANICA B01 and MECHANICA B02, DONE Watches is proud to present our latest creation at Time To Watches. The MECHANICA B03, a limited edition of 50 pieces.

The MECHANICA B03 model features the same aesthetic codes as its predecessors, but in lighter tones. Its silver-plated movement adds depth to this timepiece, revealing its mechanism in full transparency.

« CLEARLY MECHANICAL »

DONE WATCHES

The B03 measures 43.8mm in diameter with a total thickness of 10.9 mm. With its ultra-light Grade 5 titanium case and meticulously proportioned lugs, it sits comfortably, seemingly weightless on the wrist.

« True beauty comes from within »
For the MECHANICA B03 we started with a basic ETA 6497-1 movement. This was an obvious choice for DONE Watches, owing to its reliability and precision.

The DONE team reworked it, creating a modern, streamlined skeletonization of the bridges and main plate.

DONE WATCHES

The "flat polished" surface finish and the "grained" texture of the bridges add a modern, high-end technical touch

Reading the time is easy owing to the meticulously proportioned hour track on the flange, whose design in harmony with the skeletonized movement.

A specially designed rubber strap has been developed in-house to give this model a sporty, yet elegant touch, also providing great comfort on the wrist. It features a titanium folding clasp, embossed with the brand logo.
